

Online app allows you to play mah jongg with friends!

Missing mah jongg with your friends? PebbleCreek homeowner Sue Branton alerted us to a fun app that can help fill the mah jongg void during this period of social distancing: *Real Mah Jongg*. It is available for iPads and iPhones, as well as Android devices. If you prefer, you can also play on your laptop or desktop PC or Mac. Their site is realmahjongg.com.

The game is played with your American Mah Jongg card, using either the 2019 or 2020 card, and you can even play with your friends from their homes or other real people who log in from other locations! If you prefer, you can play against three other computer players.

There is a free 14-day trial period, but if you want to keep playing after that, you'll need to subscribe to their monthly plan at \$5.99/month or the yearly plan for \$59.99. We can't vouch for the performance of the software, but several test games went smoothly. If you sign up on the iOS app, the cost is \$6.99/month.

For more information, you can find their Frequently Asked Questions (FAQs) page by clicking here, <https://realmahjongg.com/contact> , then clicking on the link for the FAQs on that page.
